

DON'T TRASH CALIFORNIA

Trash, fertilizer, animal waste, used oil and other pollutants that wash into streets, storm drains, canyons and creeks end up on our beaches, tidepools or in wetlands like Machado Lake.

Zero waste — you can make it happen:

- Keep a lid on outdoor trash cans
- Follow directions when applying fertilizer and pesticides, and not before a forecast of rain
- Ensure that contractors and gardeners do not dispose of debris into streets, storm drains or canyons
- Compost or recycle yard waste and manure
- Fix oil leaks and recycle used motor oil and filters
- Deposit pet waste in the trash

For more information on pollution prevention, go to www.888CleanLA.com. Ad funded in part by a grant from the California Integrated Waste Management Board and brought to you by:
